

**200G Muxponder (P514S)**

**Product diagram**

**Functional structure**

**Application Scenario**

- Suitable for transmission over metropolitan and long-haul networks up to 1000 km long
- Suitable for high-capacity DCI network transmission for enterprises, campuses, cloud computing, etc.
- Suitable for 400G links in existing OTN/DWDM infrastructures

**Product specification**

200G Muxponder (P514S)	
<b>Slot number</b>	1/4 slot
<b>Line side</b>	Supports 1 CFP2-DCO module hot-swap
<b>OTN function</b>	Frame format and overhead handling using ITU-T G709 recommendations ODUk (k = 4, C2) layer: support for PM and other functions. OTUk (k = C2) layer: support for SM functions
<b>Wavelength adjustable</b>	Range covers 191.35 THz ~ 196.1THz Support 50 GHz, 75 GHz, 100 GHz adjustable
<b>Time delay measurement</b>	Support
<b>Client side</b>	Support 2 QSFP28 modules hot-pluggable
<b>Support services</b>	100GE、100GE FlexE(透传模式) OTU4
<b>LLDP</b>	Support
<b>Performance monitoring and alarm monitoring</b>	<ul style="list-style-type: none"> <li>● Support OTN performance monitoring and alarm monitoring functions</li> <li>● Support optical module temperature, current, optical power monitoring, etc.</li> <li>● Support Ethernet RMON monitoring</li> <li>● Support Telemetry</li> </ul>
